About This Manual

The *Test Administrator's Manual/Scripts* (TAM) contains important test administration information pertaining to all grades taking the Spring 2017 Kentucky Academic Standards Science Field Test. **All test administrators are required to read this manual prior to testing.** The script within each grade-specific TAM contains test administration information, including testing times, materials required and content-area scripts.

- **Test materials:** Pearson provides the following test materials.

Grade 7 Field Test Materials
Student Combined Booklet

- **Terminology:** test materials
  Grades 4, 7 and 11 each have student combined booklets.

Student Combined Booklet Grades 4, 7 and 11
Contains test questions and answer spaces
Student information located on front cover

2017 Important Dates	
Event	**Test Materials Arrival Date**
Manage Participation Counts in PearsonAccess. Verify Regular Counts and Enter Accommodated Material Orders	01/09/17 – 02/08/17
Regular and Accommodated Testing Materials Arrive in Districts	Week of March 6, 2017
Testing Window	03/13/17 – 03/17/17 -- Grades 4 & 7 Upon arrival of materials the week of March 6 through week of March 27-- Grade 11
Enter Additional Orders for Regular and Accommodated Testing Materials Student Combined Booklets	03/06/17 – 03/15/17 Grades 4 & 7 03/06/17 – 03/29/17 Grade 11
Enter Additional Orders for Return Shipping Materials (labels, boxes, etc.)	03/06/17 – 03/22/17 Grades 4 & 7 03/06/17 – 03/29/17 Grade 11
Return shipping for grades 4 and 7 by March 24	Districts must call UPS for pickup of both scorable and nonscorable testing materials.
Return shipping for grade 11 by March 31	Districts must call UPS for pickup of both scorable and nonscorable testing materials.

Introduction

Kentucky's Science Assessment System is a 'system' in which the emphasis is on instruction at every classroom level, K-12. This system is made up of three main components: Classroom Embedded Assessments, Through Course Tasks and a Statewide Summative Assessment.

This spring, with the exception of students taking the Alternate Assessment, all students in grades 4, 7 and 11 will take part in the Kentucky Academic Standards Science Field Test. The summative assessment, developed by Kentucky teachers, features clusters of items based on a phenomenon. Students will be asked to answer multiple choice and extended response items as a part of the field test.

This field test will look very different than state assessments given before. For example, multiple choice items may have up to eight options rather than the typical four choices. Extended response items may look like: fill-in-the-blank, short response, multiple parts, gridded or diagrams.

There are two key assessment themes for the 2017 KAS Science Field Test administration:

- **Data Quality**—collaborative process between the Office of Assessment and Accountability (OAA) and school/district staff to ensure accurate reporting of test results.
- **Test Security**—checks and processes to monitor appropriate administration of state-required tests including seating charts, room location codes and a student honor code.

Part 1: Security Requirements and Responsibilities

Security requirements are included in this manual to protect the validity of the KAS Science Field Test. **The term "secure test materials" in this document refers to student combined booklets**.

Test security measures have been added with checks and processes to monitor appropriate administration of state-required tests.

The *District and Building Assessment Coordinators' Manual* and the grade-specific *Test Administrator's Manual* have been created to assist school personnel in administering the KAS Science Field Test. District Assessment Coordinators (DACs) and Building Assessment Coordinators (BACs) are responsible for ensuring that all personnel within the school buildings are aware of the policies set forth in this manual. Failure to follow proper procedures can result in an allegation and possible invalidation of scores or other disciplinary actions. Any violation or suspected violation of test security requirements set forth in this manual must be reported to the BAC, the DAC and the Kentucky Department of Education (KDE) immediately.

Responsibilities of Test Administrators

As a test administrator, you are responsible for:

- Reading, signing and abiding by the *Administration Code for Kentucky's Educational Assessment Program (703 KAR 5:080)* and, if providing accommodations, reading, signing and abiding by the *Inclusion of Special Populations in the State-Required Assessment and Accountability Programs (703 KAR 5:070)*.
- Reading this manual (*Test Administrator's Manual/Script)* before the test administration and administering the test according to the instructions in this manual.
- Verifying that materials containing content information or strategies for solving problems are covered or removed from classroom walls, bulletin boards, or other surfaces (e.g., ceilings, floors, blinds, windows, and clothing) during testing sessions.
- Conducting makeup testing for students absent from original test day, if assigned to do so. Makeup testing is optional; however, students are encouraged to participate.
- Protecting the security of the KAS Science Field Test by carefully following the instructions in this manual for administering and handling materials through securing, counting and returning all materials to the BAC when testing is finished.
- Notifying the BAC of testing irregularities immediately.
- Reading the *Appropriate Assessment Practices Certification Form* in the Appendix of this manual, abiding by the practices described therein and returning a signed copy to your BAC.
- Returning all test materials in good condition to the BAC as soon as testing is completed or as directed by your BAC.
- Completing required seating charts for all state-required test administrations, reflecting students and adults in the testing room. The DAC will collect and maintain.

- Bubbling room location codes on the student combined booklet indicating the room where each student takes the field test.
- Reading the student honor code aloud at onset of testing and collecting student signatures on the student combined booklets.

Secure Test Materials

Confidentiality—Student Combined Booklets, Test Questions and Student Responses

> ***Caution:*** Test questions in the KAS Science Field Test are copyrighted, secure materials and may not be duplicated in any way.

- From receipt to return of testing materials, no school personnel may review, edit or share, either verbally or nonverbally, the contents of the student combined booklets without approval from KDE.
- Students may not be given access to student combined booklets by any school personnel prior to testing.
- School personnel may not reproduce any portions of the student combined booklets, except for transcription of responses by test administrators when materials are damaged (e.g., hazardous materials—nose bleed, torn pages, food contamination). Reproductions are limited to hand transcriptions. School personnel may NOT keep any hand-copied portions of the test used for transcriptions. School personnel may NOT audiotape, videotape, photograph or photocopy materials.
- School personnel may NOT retain, discard, recycle, remove or destroy student combined booklets without specific instruction from the BAC, DAC, KDE and Pearson.
    - If secure test materials are damaged, test administrators must contact their BAC or DAC prior to the BAC or DAC contacting Pearson Kentucky Customer Service at (888) 437-1430 **PRIOR** to destroying the materials. Detailed information on page 24.
    - Report the type of test material (grade and form number) damaged, the security barcode number from the pre-printed demographic barcode (explained on page 24) or from the back cover of a blank student combined booklet (explained on page 24) and what school to which the booklet was assigned.
    - The serial number from the new student combined booklet may be annotated to KDE's Student Data Review and Rosters (SDRR) application.
    - In accordance with OSHA rules, do not return test materials damaged by bodily fluids; they will not be processed or scored. These materials must be securely destroyed.

Supervising Test Sessions With and Without Accommodations

Responsibilities While Supervising Test Sessions

- All tests must be administered according to the procedures documented in this manual.

- Test administrators may NOT leave students unsupervised at any time. Test administrators must focus their full attention on students and their testing environment while supervising testing.
- Content information or strategies for solving problems on classroom walls, bulletin boards or other surfaces (e.g., ceilings, floors, blinds, windows and clothing) must be covered or removed during testing sessions. Standard periodic tables need not be covered or removed.

Responsibilities While Providing Accommodations

- Test administrators are responsible for providing appropriate accommodations as defined in Kentucky regulation *Inclusion of Special Populations in the State-Required Assessment and Accountability Programs (703 KAR 5:070)*. In Part 3: Accommodations, key points of the regulation are summarized. Provide the required accommodations identified in the student's current Individualized Education Plan (IEP), 504 Plan or Program Services Plan (PSP) and used routinely and consistently throughout the year in instruction.
- Test administrators providing accommodations may NOT leave students unsupervised at any time. Test administrators must focus their full attention on students and their testing environment while supervising testing.

Reporting Student Cheating and Score Invalidation

Student cheating or jeopardizing test security is serious and in many cases leads to invalidation of test scores. Invalidation of scores impacts not only student results, but also may impact school/district and state test results.

Monitoring a test administration session requires more than distributing materials and keeping time. Test administrators are expected to monitor students closely to ensure that every student has a fair and equal chance to receive valid scores. A test administrator's responsibilities during testing include, but are not limited to, actively moving about the room to ensure that:

* Students are answering questions in the correct areas of the student combined booklet,
* Students are using appropriate resources,
* Students are accessing only approved electronic devices,
* Students are not talking to other students, are not looking at another student's work, or
* Students are not in any way conducting themselves in a manner that would be considered inappropriate for the testing session.

A test administrator should also be attuned to student behavior before and after testing to monitor that secure material is not being shared in a manner which could include a face-to-face conversation or posting on social media.

Student

Inappropriate student behavior is not considered an allegation, but should be properly reported. Should it be determined by school/district staff that a student has cheated or jeopardized test security by revealing test information, specific steps should be taken to report the incident through the Allegation Reporting Application on KDE's website http://education.ky.gov/AA/distsupp/Pages/Allegation-Reporting.aspx. The information should

be entered into the application following the step-by-step directions provided on the website. Information regarding the incident should be gathered as soon as possible.

The information should include school/district name, testing room number, student name(s), State Student Identification number (SSID), test administrator's name(s), grade level, form number, content area, item numbers, a detailed description of what happened, how the situation was handled, date of incident, and any other information deemed to be pertinent. These details will allow KDE to remove a student's score. The schools should also use this information when determining disciplinary action for the student's misbehavior.

Test Administrator

It is considered an allegation when test administrators cause or allow inappropriate student behavior. The incident should be filed as an allegation using the same application and similar process as filing for student misbehavior. Test administrators may face consequences based on the outcome of the KDE investigation.

Alert Papers

An alert paper is any student response that raises concern about the safety or welfare of the student or others. In general, student responses should not be copied in part or whole. However, if an alert paper is found, the BAC should be notified and the student combined booklet handed over to the BAC immediately following the end of the testing session. The BAC or school administrator may then copy only the response. The copy must be kept secure as it is considered testing material. If another testing session is scheduled, the student combined booklet may be returned to the test administrator.

The BAC or school administrator is responsible for reporting the situation to proper school and district authorities, including the DAC. Those authorities should follow school or district policy for handling the situation. If there is a need for local authorities or parents to see the student response, security should be explained and a nondisclosure form signed by those parties before viewing the response. A copy of the nondisclosure form should remain on file at the district office. A nondisclosure form is located on KDE's website, www.education.ky.gov.

Student Data Review and Rosters (SDRR) Application

KDE's electronic Student Data Review and Rosters (SDRR) application will be used for the collection of student rosters, requesting non-participations and for data review.

Schools and districts are required to identify which students in grades 4, 7 and 11 participate in the Spring 2017 Science Field Test.

Student Pre-ID Listing

The Student Pre-ID Listing is a list of all students that have a pre-printed student combined booklet. The listing includes all demographic information provided in SDRR. The paper listing will be included in the School Coordinator Kit. The barcode on this listing **is** the security barcode number assigned to the student combined booklet.

Test Forms

Twenty (20) forms are available for students in grade 7. Form 1 is used with visually/hearing impaired students.

Calculator Use Policy for State Testing (Revised October 2016)

In order to create a test administration that provides every student with a fair and equitable assessment opportunity, KDE has developed a calculator policy. Following this policy will ensure that all students have a measure of their academic achievement that is comparable to all students across the state.

The KDE calculator policy applies to all state assessments (e.g. K-PREP, KYOTE, KOSSA, KAS Science Field Test), excluding any ACT assessments. The ACT calculator policy applies to all ACT assessment products (End-of-Course, the ACT and ACT WorkKeys). Both of these policies apply to all students, including those who receive test accommodations with an Individualized Education Program (IEP), Program Services Plan (PSP) or 504 Plan.

In some rare instances, a student with an IEP, PSP or a 504 Plan might use a device not listed on the approved calculator list. The District Assessment Coordinator (DAC) must submit a written request to the Office of Assessment and Accountability (OAA) for permission allowing a student to use the device not included on the list. OAA will consider the request, which will include reviewing IEPs, PSPs or 504 plans, to determine if the device is part of the plan and whether it would provide an unfair advantage on state assessments.

Prohibited Computer Applications, Programs and Documents

During test administration, all applications, programs or documents built-in, created or downloaded on calculators are prohibited for use on state assessments. This includes all applications and programs with a computer algebra system (CAS)[1]. Some permitted calculators have suppression functions, such as Press to Test, that disable applications and use of documents for testing purposes. If available, the suppression function may be used on permitted calculators to deactivate prohibited applications and programs[2]; however, all stored documents must be removed.

Prohibited Calculators

The following types of calculators are **prohibited**:

- calculators with built-in or downloaded computer algebra system functionality
  Prohibited calculators in this category include:
  - Texas Instruments: All model numbers that begin with **TI-89** or **TI-92** and the **TI-Nspire CAS**—Note: The TI-Nspire (non-CAS) is permitted.
  - Hewlett-Packard: HP Prime, HP 48GII and all model numbers that begin with HP 40G, HP 49G, or HP 50G
  - Casio: fx-CP400 (ClassPad 400), Algebra fx 2.0, ClassPad 300 and ClassPad 330, and all model numbers that begin with CFX-9970G
- handheld, tablet, or laptop computers, including PDAs
- electronic writing pads or pen-input devices—Note: The Sharp EL 9600 is permitted.
- calculators built into cell phones or any other electronic communication devices
- calculators with a keypad (letter keys in QWERTY format)—Note: Letter keys not in QWERTY format are permitted.

Calculators Permitted with Modification

The following types of calculators are **permitted, but only after they are modified as noted:**

- calculators that can hold programs or documents—Remove all documents and remove all programs that have computer algebra system functionality
- calculators with paper tape—Remove the tape
- calculators that make noise—Turn off the sound
- calculators with an infrared data port—Completely cover the infrared data port with heavy opaque material such as duct tape or electrician's tape (includes Hewlett-Packard HP 38G series, HP 39G series and HP 48G)
- calculators that have power cords—Remove all power/electrical cords

Permitted Calculators

Students may use any four-function, scientific, or graphing calculator, as long as:

- ✓ It is not on the list of **Prohibited Calculators.**
- ✓ All applications, programs and documents have been removed or deactivated as described in the **Prohibited Computer Applications, Programs and Documents section.**
- ✓ Proctors have made necessary modifications based on the **Calculators Permitted with Modification section.**

[1]Calculators with a Computer Algebra System (CAS) are capable of producing symbolic results. These calculators can manipulate algebraic expressions, performing operations such as factor, expand and simplify. In addition, calculators with CAS can give answers in exact form without numerical approximations (Wikipedia). Some examples of applications with CAS functionalities: all versions of Zoom-Math, APP4MATH, F2K, Allmath and Polynomials All in One.

[2]Knowledgeable school staff may need to assist students in reinstalling or reactivating suppressed applications after testing is complete.

Testing Irregularities

Testing irregularities occur when set procedures are not followed. They include student or educator misconduct or a mishandling of secure test materials.

Any problems that occur during testing should be documented thoroughly by the personnel involved. Test administrators should forward this documentation to their BAC, who will pass it on to the DAC. If the problem concerns secure materials that have been jeopardized, the DAC must enter information in the Allegation Reporting Application on KDE's website http://education.ky.gov/AA/distsupp/Pages/Allegation-Reporting.aspx. If the documented problem does not concern secure materials, the documentation must be kept on file at the district office.

Approved and Unapproved Testing Resources

Approved Resource Materials

Students are permitted to use only the following tools and resource materials:

Approved Resource Materials
Science Field Test ➢ No. 2 pencils only (no mechanical pencils or pencils that differ in hardness of lead) ➢ Extra lined, plain or graph paper (scratch paper). All scratch paper must be returned to the BAC for destruction. ➢ Erasers ➢ Calculators (optional)

Unapproved Resource Materials

Students are NOT permitted to use the following tools and resource materials:

- Books other than those specified above (e.g., encyclopedias, textbooks)
  Note: Once testing has been completed and a student's testing materials have been removed from the testing station, the student may read non-content material.
- Copies of acronyms
- Graphic organizers
- Computers
- Editing devices (e.g., spell-checker or grammar-checker)
- Cell phones, Smart phones
- Electronic devices (e.g., iPods, iPads, or other music players, pocket translators, PDAs)
- Ink pens
- Highlighters

Note: Students with IEPs, 504 Plans or PSPs may have some of these resources as outlined in their educational plan.

Part 2: Who Should Be Tested

Students Tested

All students enrolled in grades 4, 7 and 11, including newly enrolled students, are expected to take the KAS Science Field Test. Each school must test every student who is enrolled on the day of testing. Students may not be excluded from testing because of poor academic performance, absenteeism or discipline problems.

Students who are required to test include the following:

- Students with disabilities
- Students experiencing a minor medical emergency
- English Learners (ELs) in their second year (or beyond)
- EL students in their first year must attempt the science field test for participation (four multiple choice or one extended response)

Students With Disabilities

Students with disabilities must take the KAS Science Field Test. Students participating in the Alternate Assessment will not take the KAS Science Field Test. Students with disabilities may participate with or without accommodations. (See Part 3: Accommodations for more information.)

Medical Emergency

An injured student whose injury is not serious enough to warrant a medical non-participation request should receive appropriate accommodations that enable the student to participate in the assessment. Some examples of medical emergencies and appropriate accommodations follow:

- Broken arm—use a scribe
- Broken eyeglasses—use a reader and scribe
- Leg in traction without sedating/sedative medication—give test at home or in hospital

To document a medical emergency, the BAC must do the following:

- Notify the DAC as situations occur.
- Complete the Medical Emergency Form (paper version) and keep on file in the district.
- Annotate in SDRR, stating that an accommodation was used due to an injury or medical condition.

The Medical Emergency Form is located on KDE's website, www.education.ky.gov, and in the Appendix of this manual.

English Learners (ELs)

English Learners (ELs) must be included on student rosters and must participate in the KAS Science Field Test. The means and the degree of participation are determined by the length of time these students have been enrolled in U.S. schools.

- EL students who are in their **first year** in U.S. schools are required to attempt an English Language Proficiency (ELP) test (in grades K through 12) and take the KAS Science Field Test in for participation. **For participation, EL students must answer a minimum of four multiple-choice questions or one extended-response question on any part of the KAS Science field test.**
- EL students who are in their **second year** or later of enrollment in U.S. schools shall fully participate in the KAS Science Field Test.

More information about English Learner (EL) testing is included in the DAC/BAC manual. For questions about EL testing, see your BAC or DAC.

Alternate Testing Settings

Students Receiving Home/Hospital Instruction

Students enrolled in the district who are taught at home or are in a hospital setting are encouraged to participate in the KAS Science Field Test. Therefore, instructors of home/hospital students must be notified, trained and supplied with necessary materials in time to test these students within the testing window. However, if a student's illness or injury is such that participation in the assessment would pose a threat to the student's well-being, a medical non-participation may be requested for the student. On the following page see the Medical Non-Participation for more information regarding the steps involved in ensuring a student who qualifies for a medical non-participation is accounted for accordingly.

Students Not Tested

A student will not participate in the KAS Science Field Test if he or she:

- Participates in the Alternate Assessment
- Is expelled and not receiving services as provided for in *KRS 158.150(2)*
- Is a foreign exchange student
- Is medically unable to take the assessment
- Is in a situation allowing him or her to qualify for an extraordinary circumstance non-participation

Be sure to **inform your BAC** if you have students who meet the requirements in this section and should not be tested.

Note: Submission of a non-participation request does not guarantee approval. Do not wait to receive approval from KDE to indicate non-participation in SDRR. Do not delay the return of test materials for students pending approval of non-participation requests. **Student combined booklets should be marked as VOID and returned with nonscorable test materials even if a non-participation request has not been approved.**

Students Participating in the Alternate Assessment

Students who meet the Alternate Assessment participation guidelines will **not** take part in the KAS Science Field Test. **Student combined booklets should NOT be completed for these students.**

Students participating in the Alternate Assessment are required to complete the appropriate components (Attainment Tasks and/or Transition Attainment Record). Directions for the Alternate Assessment will be provided by your BAC. Be sure to **inform your BAC** if you have any students who participate in the Alternate Assessment.

Medical Non-Participation

A student's handicapping condition cannot be the basis for a medical non-participation. However, if a student is so ill or medically fragile and he or she is unable to complete the state-required assessment, even in a homebound situation with accommodations provided, a school may choose to request a medical non-participation for the student. If you are unsure whether a student qualifies for a medical non-participation, please contact the BAC or DAC.

The Medical Non-Participation Form can be found on KDE's website, www.education.ky.gov, and in the Appendix of this manual.

Extraordinary Circumstance Non-Participation

Students may qualify for an extraordinary circumstance non-participation if they

- Should not be tested for any reason not already listed in this section, and
- Do not qualify for a medical non-participation.

Examples of extraordinary circumstance include the following:

- Parental kidnapping
- Child in protective custody

The Extraordinary Circumstance Non-Participation Form can be found on KDE's website, www.education.ky.gov, and in the Appendix of this manual.

Non-Participation Checklist

- Notify the BAC and/or DAC before any non-participation requests are made.
- Complete the appropriate non-participation form (Medical or Extraordinary Circumstance), collect signatures from the student's doctor (if necessary), parent or guardian, and DAC (keep on file in the district).
- Document the details of the medical and extraordinary circumstance non-participation in SDRR.

Part 3: Accommodations

Students With Disabilities Using Accommodations

Accommodations are intended to provide support for students during instruction to access and learn content as well as to demonstrate content knowledge during assessment.

Accommodations shall be individualized and specifically designed to aid the student as the student learns, being faded or reduced as the student gains/demonstrates increased skill and confidence, and moves toward greater independence. Accommodations shall not inappropriately impact the content being measured. In all components of the state-required assessment, a student shall be the sole creator, author, decision-maker, and owner of his/her own work.

With very few exceptions, all students in grades 4, 7 and 11 will participate in the KAS Science Field Test. Students may be provided with assessment accommodations, based on evaluation data, if the following criteria are met:

- The accommodations must be identified in the student's current IEP, 504 Plan or PSP.
- The student must have routinely received the accommodation throughout the year during classroom instruction. Accommodations should not be added for the sole purpose of use on state-required assessments.
- The accommodations shall not impact the content validity being measured.
- All accommodations shall be provided in accordance with regulation 703 KAR 5:070 as outlined by a student's placement team or Admissions and Release Committee (ARC), unless the student specifically refuses such accommodations.

Many accommodations used in the instructional program for students with disabilities are permitted for testing as long as they do not give the student an unfair advantage. For example, if a student normally wears noise buffers while working, this accommodation can be used during testing.

Occasionally, noncertified staff members or volunteers provide accommodations for students. Please note that such people should receive thorough training and are required to sign the nondisclosure form found on KDE's website, www.education.ky.gov.

Training must include two regulations, *703 KAR 5:070—Inclusion of Special Populations in the State-Required Assessment and Accountability Programs* and *703 KAR 5:080—Administration Code for Kentucky's Educational Assessment Programs.* Assessment regulations and training materials are on KDE's website, www.education.ky.gov.

Specific accommodations used for assessments are maintained in the student's IEP, 504 Plan or PSP, and are no longer collected in SDRR.

Authorized school personnel must also update the student's information in Infinite Campus (IC) to indicate if accommodations were used during testing.

There are a variety of assessment accommodations that may be used for students with disabilities, including the following:

* Use of assistive technology
* Manipulatives
* Reader
* Scribe
* Paraphrasing
* Calculator
* Extended time
* Reinforcement and behavior modification strategies
* Interpreters for students with deafness or hearing impairment (signing)
* Simplified language and oral native language support for ELs

The following information summarizes how to specifically administer accommodations. Test administrators providing accommodations must have completed training on *703 KAR 5:070*. Accommodations shall not be designed or provided solely for the state-required assessment, or to lead a student to any specific answer. Specific accommodations used for assessments are maintained in the student's IEP, 504 Plan or PSP, and are no longer collected in SDRR.

Use of Assistive Technology

During the KAS Science Field Test, a student with a disability may use special equipment, including assistive technology described in the student's IEP or 504 Plan, which is part of the student's regular instructional routine. "An assistive technology device, as defined by (20 U.S.C.§ 1401 (1) (a)), is any item, piece of equipment or product system whether acquired commercially, off the shelf, modified or customized that is used to increase or improve functional capabilities of individuals with disabilities." If the use of special equipment (e.g., talking calculators) during the state-required assessment would influence or distract the performance of another student, then the assessment must be administered to the student using special equipment in an alternate setting.

Examples include the following:

- Amplification equipment
- Noise buffers
- Magnifying devices
- The non-standard response template allows a student to respond to writing tasks by typing on a computer. This accommodation is only allowed if the accommodation is noted on the student's IEP or 504 Plan, and the student uses this procedure routinely in his or her regular instructional program.

Non-Standard Response Template

Before the assessment begins**,** the school must download the science non-standard response template located on KDE's website, www.education.ky.gov on the Forms page (titled KAS Science Field Test Non-Standard Response Template). There is only one template available for the KAS Science Field Test.

The student's responses to the spring 2017 KAS Science Field Test questions or writing tasks may not be saved to the hard drive of the computer where the student is working, or to any part

of a computer network to which the student's computer may be attached. Responses must only be saved directly to a portable drive or a CD for the duration of the test.

After the student has completed a testing session, the test administrator must **immediately** follow these steps:

1. Print the student's response.
2. Cut the print-out to fit in the boxed area of the student combined booklet and tape (clear tape) the student's print-out into the corresponding area. (Do not attach pages with staples, glue or paper clips.) In the case of items where students use graph paper to create graphs or charts, or to used unlined paper to draw a model or diagram, cut these out and tape in this portion of the student response in the appropriate area as well. Using clear tape, make sure the document is taped within the box on the page, covering at least the four corners of the document with the clear tape, and do not cover any bar codes or timing tracks. Note: The outer margin of the template for the KAS Science Field Test is smaller so caution must be taken to not have tape over any markings on the student combined booklet.
3. Make sure the portable drive or CD containing the saved responses, along with the scannable booklet, is stored securely until the next part of the assessment is administered. Make sure to write the student's name on the portable drive or CD label.
4. Once each session is complete, the computer on which the student was working must be logged off from any network to which it was attached and completely powered down to ensure elimination of any student work that may have been saved in a temporary file.
5. After all sessions are completed, the responses have been printed and responses taped in the booklets, the test administrator must erase the portable drive or CD.
6. The portable drive or CD, and a note of explanation, must be given to the BAC.

Note: DO NOT return the portable drive or CD with student responses to Pearson. The BAC or DAC must reformat the portable drive so that it may be reused and must destroy any CD.

Note: No cell/smart phones, camera devices or other electronic communication devices shall be accessible during testing by students.

Use of Manipulatives

Manipulatives shall be available for student use to complete the state-required assessments, if they are a strategy used by the student to solve problems routinely during instruction, and the use of manipulatives is described in the student's IEP or 504 Plan. Manipulatives cannot be placed on a student's desk, but instead should be located in a place in which the student can access them when needed. No one, including test administrators, should encourage the student to use specific manipulatives.

Students with manipulatives on their IEP or 504 Plan may also have one 3x5 notecard with blank graphic organizers on it (front and back) as one of their manipulatives.

Reader

Note: Scripts are included in the grade-specific Test Administrator Manuals.

The use of a human reader is allowed on all sections of the state-required assessment (i.e., reading, mathematics, science, social studies and writing). The use of a reader shall not in any way lead the student to the correct answer.

The role of the reader during the state-required assessments is to:

- Read directions, prompts, situations, passages and stories as written;
- Not use or provide additional information or directions that may lead the student to specific information needed to answer the question;
- Re-read the directions, prompts, situations, passages and stories only if specifically requested by the student;
- Not point out parts of the task, questions or parts skipped by the student; and
- Read individual words or abbreviations that are mispronounced by text or screen readers, if specifically requested by the student.

Scribe

A scribe's role shall be to record the student's responses so that they reflect what the student knows and is able to do while providing the student with an alternative means to express his or her thoughts and knowledge. At no time shall a student's ideas, revisions or editing be characterized as teacher-authored. In all components of the KAS Science Field Test, a student shall be the sole creator, author, decision-maker, and owner of his or her work. A scribe shall record student responses in a manner consistent with the accommodations described in the student's current IEP, 504 Plan or PSP.

A scribe shall:

- Record what the student dictates word for word;
- Format, capitalize and punctuate the student's writing as directed by the student;
- Give the written product to the student to edit or revise;
- Not alter, edit or revise a student's own ideas, revisions or edits;

Calculator

The use of a permitted calculator (See full calculator policy.) is allowed on all sections of the state-required assessment for students with an IEP or 504 Plan including those sections labeled non-calculator. The test administrator is not permitted to encourage the use of a calculator.

It is the examinee's responsibility to know whether his/her type calculator is permitted. Calculators that hold documents or programs must have all documents and programs removed that have computer algebra system functionality.

Paraphrasing

The test administrator will paraphrase as needed, but in no way lead the student to the answer.

Paraphrasing during the state-required assessment shall be limited to the following:

- Breaking directions into parts or segments;
- Using similar words or phrases in directions; and
- Repeating or rephrasing directions.

Paraphrasing shall not include defining words or concepts, teaching vocabulary, or telling a student what to do first, second, etc.

Extended Time

Extended time shall be available to the student once standard test time has ended. Extended time will be given as long as the student is demonstrating on-task efforts which allow the student to make progress on completing his/her assessment responses. The school shall provide proper supervision to maintain an appropriate assessment atmosphere. Extended time is limited to time and a half or double time. For example—If standard time is 70 minutes and a student is allowed time and a half, then after the student requests to use extended time, the student would be given an additional 35 minutes (half of the original 70 minutes).

Reinforcement and Behavior Modification Strategies

Reinforcement and behavior modification strategies are allowed on the state-required assessment when they are documented in a student's IEP or behavior intervention plan and are used on a routine basis during instruction.

Strategies may include:

- Verbal, tangible or tactile reinforcements for being on task
- Use of technology to focus attention or reduce stress
- Testing in a separate location outside the regular classroom

Interpreters for Students With Deafness or Hearing Impairment (Signing)

The KAS Science Field Test may be signed (i.e., translated to the student using American Sign Language). Signing shall not be a replacement for technology or reading instruction. Interpreters shall not define words for students, provide content or teach vocabulary or concepts during the assessment.

Interpreters who are also scribes shall follow the policies on scribing outlined in *703 KAR 5:070—Inclusion of Special Populations in the State-Required Assessment and Accountability Programs* document located on KDE's website, www.education.ky.gov.

Use of Simplified Language and Oral Native Language Support for an EL Student

The use of simplified language and oral native language support for a student with limited English proficiency shall not inappropriately impact the content being measured.

Simplified language and vocabulary shall not change the overall context of the test materials or the content, but ensures that students understand how to take the test. Specific words may be exchanged, but words cannot be defined as part of simplifying language. Directions for test administration may be described using less complex words (i.e., the word "assessment" becomes "test") and sentence structure (i.e., break a sentence into smaller sections). It is considered best practice to use a word-to-word translation. Simplified language includes: breaking directions into parts or segments or using similar words or phrased that are easier for the student to understand.

Oral native language support shall be based on a student's individual language needs as documented in the PSP. This accommodation may range from assistance with specific vocabulary to a sight translation which means rendering printed English test materials orally in the student's native language. The accommodation of oral native language support may include providing directions orally in a student's native language. The accommodation may also incorporate some simplification of language in the test administration directions.

Bilingual or English dictionaries can be in print or electronic versions. The dictionary should be a word-to-word translation without definitions. Be sure all extra Internet capabilities are turned off prior to the beginning of testing.

Accommodated Materials

Accommodated orders will be collected via PearsonAccess, January 9 - February 8, and will be shipped with the initial distribution of test materials. Form 1 is used with visually/hearing impaired students. Additional orders may be placed if needed.

Accommodated Materials Ordering

The DAC may order accommodated materials for the KAS Science Field Test March 6 – March 29. Refer to the 2017 Important Dates on page 2.

Accommodated Materials	
Item	**Item Notes**
Large-Print Kit (for students who are visually impaired) **Note: Only print is enlarged. All graphics and illustrations are regular size print.**	Each Large-Print Kit contains the following materials: ➢ Large-print student combined booklet ➢ Form 1 student combined booklet (regular print) ➢ Accommodated Orders Information Memo

Part 4: Test Preparation

General Instructions for Test Administration

Tests are to be administered using standard testing procedures as outlined in this manual. It is very important that these procedures are followed, and that any deviations from standard testing conditions are documented and reported to the BAC.

Before Testing Checklist

1. Read this manual in its entirety.
2. Inventory test materials received from the BAC.
3. Secure additional materials needed for testing (e.g., No. 2 pencils only [no mechanical pencils or pencils that differ in hardness of lead], erasers, dictionaries, thesauri). See Approved Resource Materials in Part 1.

Scheduling the Tests

A testing schedule should be created so that it includes time for testing all students in Grades 4, 7 and 11, including those with extended time.

Makeup Tests

Makeup testing is encouraged prior to the return of all testing materials, but is not a requirement.

Allowed Testing Time

Seventy (70) minutes is permitted for the administration of the KAS Science Field Test.

Test Materials

The BAC will distribute test materials. Please check to make sure you receive the correct materials for testing your students. If you need additional materials before or during testing, contact your BAC. Each student must be assigned only one student combined booklet (grades 4, 7 and 11) for use throughout the assessment.

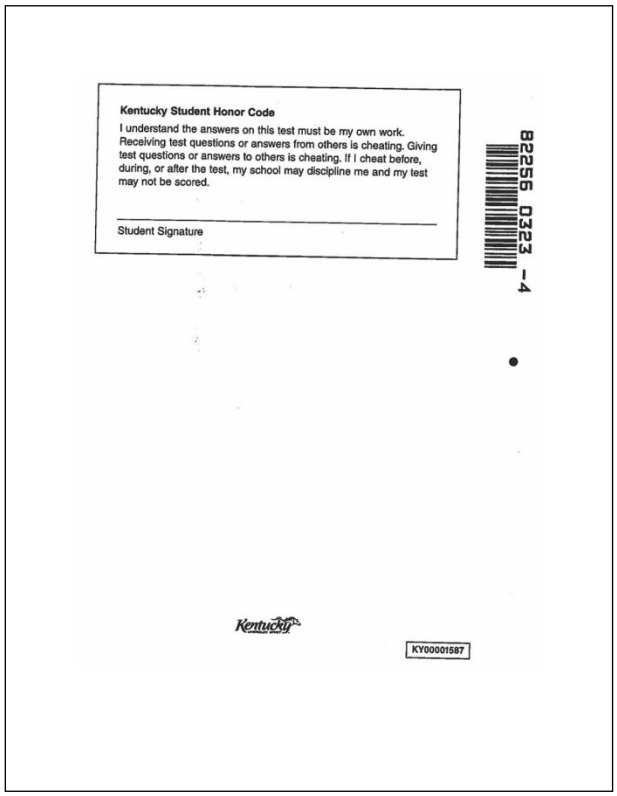

Inventory of Test Materials

The test materials will be received in shrink-wrapped packs, both the pre-printed student combined booklets, and blank packs of 5 student combined booklets.

Prior to distribution, inventory the test materials with the BAC. The *School Test Materials Security Checklist* should be used to inventory materials before distribution, so that you can verify all student combined booklets have been collected when you return them to your BAC. When not in use by students, store test materials in a secure location. Test materials stored in a classroom must be double locked (such as in a locked cabinet in the locked classroom).

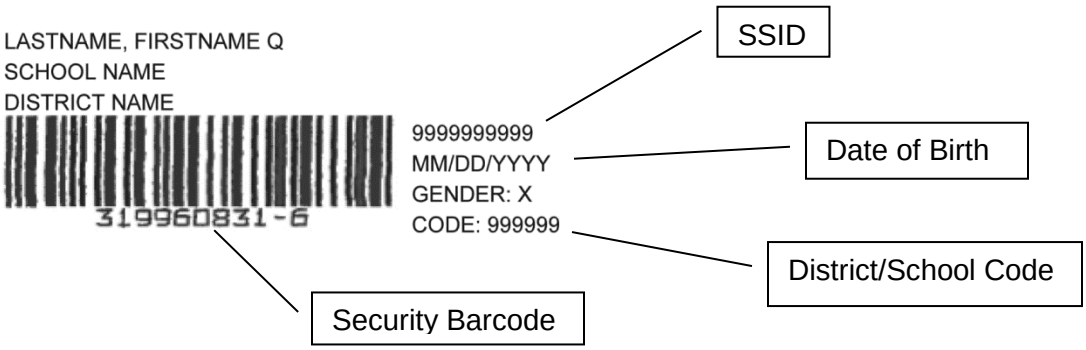

Student Combined Booklet Security Barcode Number—Overage Only

As illustrated in the following figure, the overage of student combined booklets have a unique barcode, also known as a security barcode number, located in the upper right corner of the back cover. These are to be assigned to students that do not have a pre-printed student combined booklet assigned to them before testing.

Pre-Printed Demographic Information

Below is how the demographic information will look on the pre-printed student combined booklet. For the KAS Science Field Test the security barcode is included in the pre-printed information for students assigned a pre-printed student combined booklet.

Pre-Printed Student Combined Booklet

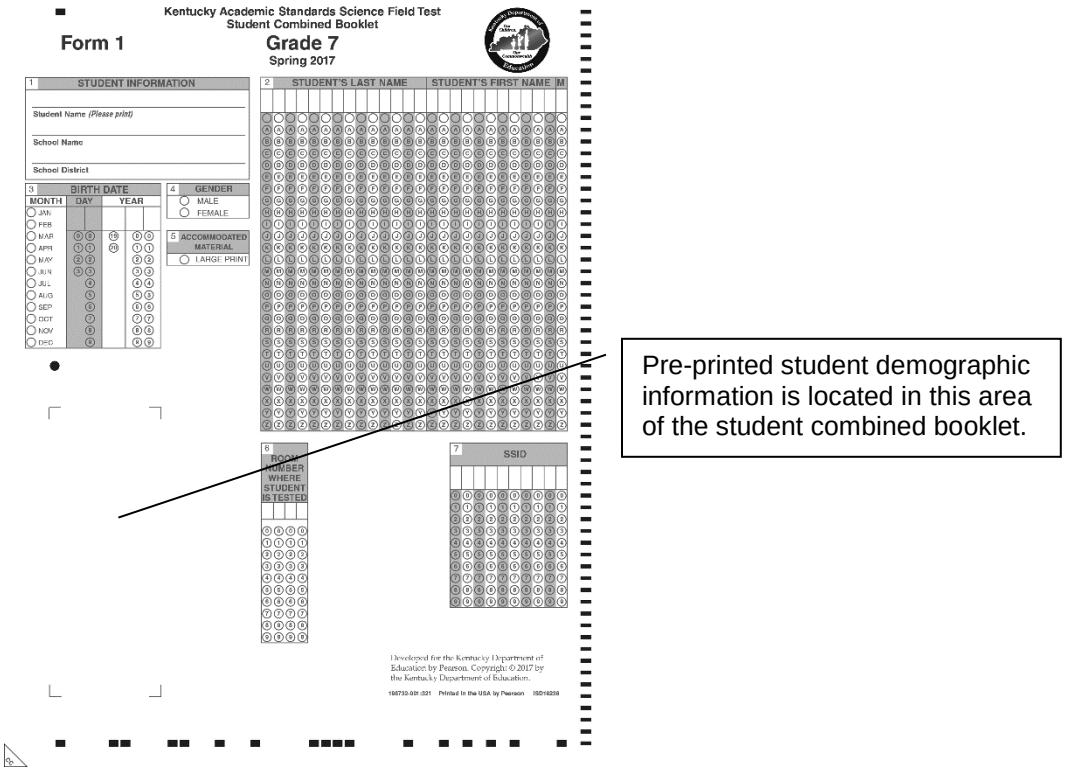

All students included in KDE's Student Information System (Infinite Campus) before test materials are shipped will have a pre-printed student combined booklet for testing. If the student's pre-printed student combined booklet has incorrect demographic information, the pre-printed booklet will need to be marked "VOID" across the booklet in black marker. A new blank student combined booklet must be provided. Gridding instructions are in the script portion of this manual. Codes are to be bubbled on the student combined booklets indicating the room where each student takes the test.

Unless damaged by bodily fluids all VOID student combined booklets are to be returned in the nonscorable shipment.

Space is provided in the student combined booklets for students to record their responses to the multiple-choice and extended-response questions. Students' written answers to the extended-response questions must be contained within the boxed spaces on the designated pages.

Note: If the pre-printed student combined booklet has incorrect demographic information, correct the information in IC.

Students may **not** make notes in their student combined booklets; they should use the blank paper provided during testing. The student combined booklets are machine scanned, and any marks other than responses to the test questions could interfere with the processing of these booklets.

Pre-printed student demographic information is located in this area of the student combined booklet.

Serial Number

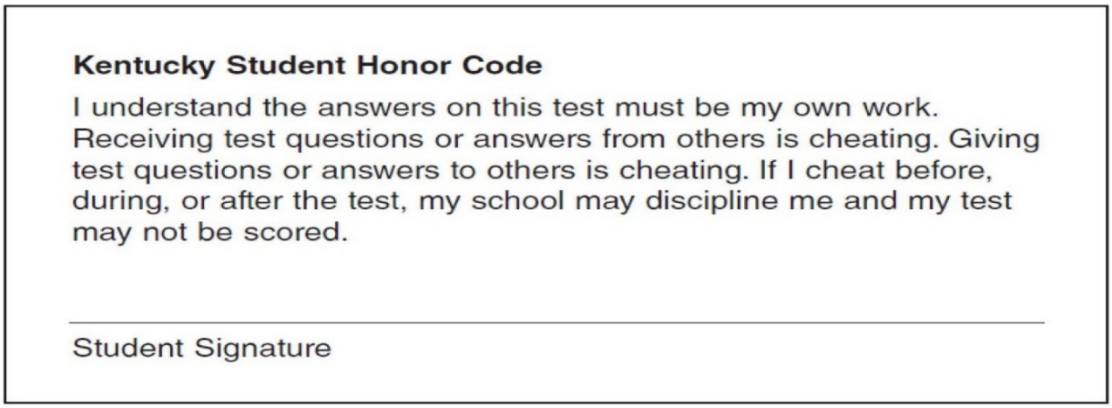

This unique seven-digit number is used to track a student to a student combined booklet. The serial number is located on the front page of the student combined booklet in the lower right corner. This number may be entered in SDRR for newly enrolled students, students missing a pre-printed student combined booklet or if a new student combined booklet is used to replace one that has been damaged.

Room Location Codes

Room location codes should be bubbled on the student combined booklet indicating the room where each student took the KAS Science Field Test. For locations without a room number (e.g., library) the BAC will assign a room number and maintain the list.

Student Honor Code

A student honor code has been printed on the back page of the student combined booklet. Test administrators will read aloud the student honor code and have students sign the honor code prior to the onset of testing. This process is one of the critical pieces of test security that was added to monitor appropriate administration of state-required tests. Students should be reminded of the importance of doing their own work and always putting forth their best effort. If the student refuses to sign the honor code, testing should move forward.

Kentucky Student Honor Code

I understand the answers on this test must be my own work. Receiving test questions or answers from others is cheating. Giving test questions or answers to others is cheating. If I cheat before, during, or after the test, my school may discipline me and my test may not be scored.

Student Signature

Seating Charts

Seating charts for both groups and/or individuals are required for all state-required test administrations, reflecting students and adults in the testing room. The DAC will collect and maintain. Examples are provided on KDE's website, www.education.ky.gov, and in the Appendix of this manual.

Student Survey

On the inside back cover of the KAS Science Field Test is a Student Survey. The student will need to complete the survey as a class after the last student finishes testing. The survey questions reflect on the test items they have just completed. The survey results are not included in test results and will not reveal individual student information.

Void Student Combined Booklet

When a student combined booklet needs to be voided for any reason, "VOID" must be written across the front of the booklet with a black marker. **Once testing is complete, all voided booklets are to be returned with the nonscorable shipment except those damaged by bodily fluids; those will need to be securely destroyed**.

Examples of reasons a booklet would be voided include:

- Damaged by food
- Damaged by water
- Booklets that have torn pages
- Incorrect demographics on student combined booklet
- Student combined booklets for students with an approved non-participation request (returned with the nonscorable shipment).

Test Materials Damaged by Bodily Fluids

Secure Student Combined Booklets

For the KAS Science Field Test there is one student combined booklet. If a student combined booklet has been **damaged by bodily fluids** (e.g., a nosebleed), the BAC or DAC will contact Pearson at (888) 437-1430 so the service center may properly document necessary data prior to destruction of the materials in accordance with OSHA rules. Provide information to the BAC as to why the student combined booklet was destroyed. The BAC will note this on the *School Test Materials Security Checklist*. If the student combined booklet was damaged after the student began testing, the student's responses must be transcribed into a new student combined booklets, of the same form number as the original student combined booklet, by trained school personnel. Make sure that once the student's responses are transcribed the damaged booklet has "VOID" marked across it in black marker and it is returned to the BAC or DAC to be securely destroyed.

If a student combined booklet is damaged, replace it with a new booklet.

- Report the type of test material (grade and form number) damaged, the security barcode number from the pre-printed student combined booklet and the school in which the student combined booklet was assigned. Remember when assigning a new student combined booklet from overage test materials, assign the new security barcode from the back of the student combined booklet on the *School Test Materials Security Checklist.*
- When a student combined booklet is damaged, the test administrator must contact the BAC or DAC to determine next steps. The BAC or DAC will keep a record at the district with the following information: student's name, serial number from the front of the damaged student combined booklet, security barcode number and reason for destroying.
- In accordance with OSHA rules, do **NOT** return test materials damaged by bodily fluids; they will not be processed or scored. These materials must be securely destroyed.
- The materials must be securely destroyed and the serial number from the new student combined booklet may be annotated in SDRR.

Accommodated Materials/Requests

DACs should have ordered all necessary accommodated materials. If you have a student that needs a large-print accommodation, please advise your BAC or DAC. For accommodated information, see page 19.

Preparing for Irregularities During Testing

Interruptions During Testing

Circumstances over which you have no control (e.g., fire alarms or power outages) may interrupt testing. If testing is interrupted and time permits, note the amount of remaining time, collect all test materials from students and secure the room. When normal conditions are restored, redistribute the testing materials to students and resume testing. Interruptions should not reduce the total amount of time students are given to complete the test.

Should interruptions occur, document the occurrence and notify your BAC immediately. All documentation should be forwarded to the DAC and kept on file in the district office.

Part 5: Test Administration

Test Day Preparations

Just Prior to Testing

- Review the scripts that you will read to students during testing.
- Acquire one student combined booklet to use as a visual aid while you give directions. (Be sure to return these secure materials after testing.)
- Confirm that you have all of the necessary supplies for the test administration.
- Post a "TESTING—PLEASE DO NOT DISTURB" sign on the classroom door.
- Be sure that all students have comfortable and adequate work spaces.
- Instruct students to clear their desks of books and other materials not needed for the test.
- Hand out testing materials. See the section titled "Materials Needed" below.

During Testing

- Maintain test security.
- Write the allowed time for the test in a classroom area where all students can see it. Be sure to write both the start and end times.
- Verify the room number where the student is taking the test is on the student combined booklet.
- Be available to answer questions as necessary.
- Monitor students' handling of test materials to ensure the materials remain in good condition.
- Notify your BAC of any testing irregularity as soon as possible.
- Reminders may be given to the entire class when 15 minutes and 5 minutes time intervals remain. Countdown timers are allowed as long as they make no noise.

Materials Needed

See the list below when preparing materials for testing.

- No. 2 pencils only (no mechanical pencils or pencils that differ in hardness of lead)
- Erasers
- Calculators (optional)
- Scratch paper (Scratch paper is returned to BAC for destroying after testing.)

Part 6: Scripts

Overview

This section includes instructions and scripts detailing the procedures to be followed. To ensure consistent and accurate test administration, instructions must be read aloud to students at the beginning of the test. The instruction scripts are printed in bold type and enclosed in boxes. Directions for test administrators are printed in italic type.

Note: Reminder to allow for students needing extended time when developing test schedules.

Distribute Student Combined Booklet

Distribute one student combined booklet to each student.

Note: Complete seating chart for each test.

Completing Student Information

Estimated Time: 10 minutes

1. School and district name can be written on board for students to copy.

2. Say to the students:

You are now preparing to begin the Kentucky Academic Standards Science Field Test.

3. Most students will have a pre-printed student combined booklet. For those without a pre-printed student combined booklet provide the following instructions for completing the demographic information on the student combined booklet. (If all students have pre-printed forms, only read the boxes labeled “All Students.” These include directions for Box 1, Student Information; and Box 6, Room Number Where Student Is Tested.)

   Say to the students:

All Students	**It is very important that you print the information correctly. Listen carefully as I read the instructions. Raise your hand if you have any questions. Mark only the spaces I tell you to mark. Do not make any stray marks on your student combined booklet. If you make a mistake, erase your marks completely and then fill in the correct information. In Box 1, “Student Information,” print your name, school and district name.**

If you have a pre-printed student combined booklet, please sit quietly until other students have completed the form.

4. For any students who do not have pre-printed forms, say:

In Box 2, below "Student's Last Name" print the letters in your last name, starting in the first box on the left. Do not leave any spaces between the letters in your last name. Then print the letters in your first name and middle initial in the appropriate boxes. If your name is longer than the number of spaces given, print as many letters as you can.

[Pause.]

Now, under each letter you have written, fill in the bubble that contains the same letter. You should not fill in any bubbles under blank boxes.

When you have finished, check that the letters in your name have been bubbled correctly.

[Walk around to check that this is being done properly.]

Box 3 is labeled "Birth Date." Fill in the bubble next to the month in which you were born. In the boxes under "Day," write the two numbers for the date of the day you were born. If your birth date is a single number, put a zero in the first box and the number of your birth date in the second box. For example, if you were born on the 7th day of the month, you would enter zero in the first box and 7 in the second box under "Day." Under each number you have entered, fill in the bubble with the same number.

In the three boxes under "Year," write the first two digits of the year in which you were born in the first box.

[Pause.]

Then, in the second and third box, enter the last two digits of the year in which you were born. Under each number you have entered, fill in the bubble below with the same number.

Box 4 is labeled "Gender." Darken the bubble for either "Male" or "Female" to indicate your gender.

[Pause.]

Box 5 will be filled out by the test administrator after booklets are handed in.

It is up to the test administrator to make note of students that need to have the "ACCOMMODATED MATERIALS" bubble gridded in after testing.

All Students

Before reading the information below for Box 6 the Test Administrator must write the room number on the board. This is a four-digit field. If the room number is less than four digits, place zeros in front of the room number to make it four digits long. For example, if the student is taking their Science test in Room 1, write SCIENCE on the board with the room number 0001 below it.

Now all students should mark Box 6. Box 6 is labeled "Room Number Where Student is Tested," Write the room number in the box and then grid the numbers accordingly below.

Make sure all students are following this step.

Box 7 is labeled "SSID." This will be filled out by the test administrator after the booklets are handed in.

Note: It is up to the test administrator to make note of students that need to have their SSID gridded in after testing.

Make sure students have correctly filled in their name, date of birth, gender, grade and form and that all bubbles are gridded before moving on.

All Students	**Once you have completed filling out the room number, please turn your student combined booklet to the back page. This page contains the Student Honor Code which reminds you to act honestly before, during and after testing. Test administrators are also required to sign a form stating that we will act in an honest and professional manner. Follow along silently as I read aloud the Kentucky Student Honor Code.** **Kentucky Student Honor Code** **I understand the answers on this test must be my own work. Receiving test questions or answers from others is cheating. Giving test questions or answers to others is cheating. If I cheat before, during or after the test, my school may discipline me and my test may not be scored.** **It is very important that you realize that you should do your own work and try to the best of your ability, always putting forth your best effort.** **Below the statement there is a line, please sign your name.** *Make sure all students are following this step.*

5. Once students have completed filling out the identification information and have signed the Student Honor Code statement on their student combined booklets, proceed with the test.

   Note: If a student is unwilling to sign the Student Honor Code, testing should not be delayed; document the incident and proceed with the test.

Science Field Test

The table below shows the time allowed.

Science Field Test	Testing Time—70 minutes

1. Check to see that each student has his or her own test materials. Hand out any additional materials needed to complete this testing part.

Science

- No. 2 pencils only (no mechanical pencils or pencils that differ in hardness of lead)
- Extra lined, plain, or graph paper (scratch paper)
- Erasers
- Calculators (optional)

2. Say to the students:

We will now begin the KAS Science Field Test. Some of the questions may be difficult to answer, but it is important that you do your best. If you are not sure of the answer to a question, you should still attempt to answer it.

[Allow enough time for students to read the page.]

Does anyone have any questions?

On page 3 is the Extended-Response Questions General Scoring Guide for review to use with questions throughout the following test. Remember, your responses to the extended-response questions must fit within the designated spaces.

Some extended response spaces may be labeled as having different parts, such as Part A, Part B and/or Part C. These markings are only there as a reminder to answer all parts of the question. Your answer to one part of a question is not limited to just the suggested space. For example, if you need more space to answer Part B of a question it is OK for you to use some of the space provided for Part A. Everything you write or draw inside the response area will be read and scored.

3. Say to the students:

Turn to page 4 in your student combined booklet. Look at the examples of correct and incorrect marks at the top of the page. When answering questions in your combined student booklet:

- **Use only soft black lead pencil (No. 2).**
- **Do NOT use ink or ball-point pen.**
- **When marking your answers to multiple-choice questions, make heavy, dark marks that completely fill the circle.**
- **Completely erase any marks you wish to change.**
- **Do not make any stray marks on any page of your student combined booklet.**
- **For the extended-response questions, be sure you write your answers on the lines and in the spaces provided. Answers or parts of answers written outside the boxed areas cannot be scored. Some extended response spaces are different sizes depending upon the question.**

Does anyone have any questions?

4. Say to the students:

Now turn to page 5 in your student combined booklet. Please read the directions in the box at the top of the page silently while I read them aloud.

[Read the following directions to the students.]

Read all the information and questions carefully. Choose the best answer(s). Mark all your answers in this test booklet.

5. Record the start time and the end time where all students will be able to see them.

Say to the students.

You will have 70 minutes to answer the questions from two separate clusters. You are not required to stop between clusters.

6. Say to the students.

Each cluster or section is about a different phenomenon. Read all the information and the questions carefully. Choose the best answer(s). Some multiple choice items will require you to choose more than one answer. Mark all your answers in the student combined booklet.

7. Say to the students:

Please stop when you come to the stop sign at the end of the second set of questions.

Does anyone have any questions? *[Make sure students are on the correct page of the student combined booklet.]*

You may turn the page and begin.

8. Circulate and monitor students' work during the test.

9. Say to the students:

Stop. Now turn to the inside back cover of your student combined booklet. Please read the directions at the top of the page silently while I read them aloud.

Please complete the following questions to reflect on the test items you have just completed. These survey questions are not part of the test and will be kept private.

Please stop when you come to the stop sign at the end of the questions.

Does anyone have any questions?

You may begin.

10. Circulate and monitor students' work during the student survey.

This completes the science test. Please close your student combined booklet.

11. Before collecting all test materials verify that all students have written their name, school and district name on the front cover of the student combined booklet. Store all test materials in a secure place.

12. Collect the scratch paper and follow the directions provided by the DAC or BAC for destroying it.

<u>This is the end of the KAS Science Field Test for this grade.</u>

Part 7: After Test Administration

Test Administration Verifications and Post-Test Procedures

Your special attention to these procedures will greatly help your BAC and Pearson promptly process testing materials.

After Testing

- Conduct any necessary makeup tests. See the section titled Makeup Tests on page 20.
- Collect all test materials assigned to you.

Student Combined Booklet

- Verify that you are submitting a student combined booklet for every student. There is one exception: no student combined booklets are returned for students participating in the Alternate Assessment.
- Ensure each booklet is in good condition.
- Make sure those students that did not have a pre-printed student combined booklet have bubbled in their demographic information correctly and completely.
- Ensure each booklet is properly marked.
- Ensure each booklet is free of scratch paper.
- Sign the *School Test Materials Security Checklist* to document that all security number barcoded test materials assigned to you have been returned.
- Identify which student combined booklets will be voided by BACs and be prepared to provide information regarding the reason. Examples of voided student combined booklets include but are not limited to booklets damaged by food or water, or booklets with torn pages.
    - Write VOID on the front of the student combined booklet in black marker.
    - Deliver voided student combined booklets that have been **damaged by bodily fluids** to the BAC to be securely destroyed, all other VOID student combined booklets are to be shipped to Pearson with the nonscorable shipment.

> ***Note:*** If a student combined booklet is damaged after a student completes testing, all responses from the voided booklet must be transcribed to a new student combined booklet.

Scratch Paper

- Verify that scratch paper used during the test has been collected and removed.
- Follow directions provided by your BAC for destroying scratch paper.

Final Steps

- Organize the materials prior to handing them over to your BAC as per DAC instruction.
- Verify that all materials assigned to you have been returned.

Appendix: Forms

Form Descriptions

Appropriate Assessment Practices Certification Form

The Appropriate Assessment Practices Certification Form is included in the Appendix of every *Test Administrator's Manual/Scripts*. This form should be read and signed by each test administrator and kept on file by the BAC and/or the DAC. **A paper copy should be retained in the district office.**

Extraordinary Circumstance Non-Participation Form

The Extraordinary Circumstance Non-Participation Form should be used for students who should not be tested for reasons other than a medical non-participation. Document the details in SDRR. The form can be found in this Appendix or on KDE's website, www.education.ky.gov. The completed paper copy should be retained in the district office.

Medical Emergency Form

Some medical emergencies that occur during testing can be addressed by using accommodations in a school, classroom or homebound setting. For example, a student with a broken arm can have a scribe to record answers to the test questions.

Approval from KDE is not necessary for providing the needed accommodations. The completed form should be kept on file in the district. Annotate the student's SDRR record. The Medical Emergency Form can be found in this Appendix or on KDE's website, www.education.ky.gov.

Medical Non-Participation Instructions:

Guidelines for Completion of Medical Non-Participation Forms

It is the intent of the Kentucky General Assembly that all students participate in the assessment and accountability components of KRS 158.645–KRS 158.6455.

The few exceptions currently allowed include those few students who cannot complete either the regular or alternate assessment components even with allowable accommodations because of medical or mental health conditions.

It is important to note that a student's handicapping condition cannot be used as the justification for a medical non-participation. Because these children must be educated with the handicapping condition, they must also be assessed with the condition using appropriate accommodations. Homebound and school testing schedules do not require testing sessions for the entire school day. In most cases, sessions are spread over the testing window and vary by grade level.

If an accountable school feels that participation in the state-required assessment would be detrimental to a student's physical, mental or emotional well-being, the DAC or BAC must complete the Medical Non-Participation Form and obtain signatures from a physician and the student's parent/guardian. The information provided should reflect the situation just prior to or during the testing window.

Examples of the types of medical conditions that are readily approved by KDE include the following:

- A student is seriously injured in an accident just prior to or during the testing window.
- A student is confined to home or hospital with an acute situation, not a long-term home/hospital instruction situation.
- A student is unable to interact with people without serious risk of infection or contamination to others.
- A student is pregnant with complications that endanger health of mother or child or has delivered just prior to or during the testing window.
- A student has a documented mental health crisis that makes him or her dangerous to self and/or others.

The information from this non-participation form should be entered into SDRR. The paper copy should be retained in the district office. The Medical Non-Participation Form can be found in this Appendix or on KDE's website, www.education.ky.gov. The student combined booklet for the student is to be returned with the secure nonscorable shipment.

Seating Charts

Seating charts available for groups and/or individuals are required for all state-required test administrations, reflecting students and adults in the testing room. The DAC will collect and maintain. Seating charts are available online, www.education.ky.gov, and in this Appendix.

Spring 2017 Kentucky Academic Standards Science Field Test
Appropriate Assessment Practices Certification Form

Appropriate Assessment Practices

The Kentucky General Assembly through KRS 158.6453 requires an innovative student assessment program designed to measure student progress toward achievement of the goals specified in KRS 158.6451. The purpose of this document is to describe the practices that are considered appropriate in preparing students for the assessments, in administering them and in assuring proper security of the assessments.

In determining appropriate practices, the following standards have been used:

- Professional Ethics—No test-preparation practice should violate the ethical standards of the education profession in 16 KAR 1:020.
- Educational Defensibility— All test preparation practices shall be designed and used for the purpose of increasing student learning
- Student Ownership—All assessment work shall be done entirely by the student. No one shall coach, edit, or point out errors in student work on the extended-response or multiple-choice portions of the test.

The first standard simply refers to evaluating the appropriateness of a practice to determine whether it meets standards of professional ethics. Therefore, such activities as duplicating secure testing materials, which is specifically prohibited, would be considered inappropriate by applying this standard. Only those items designated by the department or its contractors as "released" may be reproduced for any reason without the specific written permission from the Kentucky Department of Education (KDE). The second and third standards encourage any activities that increase student mastery of the content being tested, but would classify as unacceptable any practice that creates a deceptive picture of student achievement.

Administrators and teachers should all use due diligence to ensure the security of the test before, during, and after administration. All copies of materials shall be returned to the testing contractor immediately following administration or properly secured through procedures that may be issued by the department. No assessment materials other than those officially designated as released may be duplicated. All directions in the *District and Building Assessment Coordinators' Manual* and the *Test Administrator's Manual* that accompany the test materials shall be followed. For additional information concerning appropriate assessment practices, please refer to the *Administration Code for Kentucky's Educational Assessment Program (703 KAR 5:080) at http://education.ky.gov/AA/distsupp/Pages/AdminCode.aspx.*

A 2017 Appropriate Assessment Practices Certification Form signature block is provided on the next page. All school personnel involved in the assessment must sign this form. Additionally, a test administrator guide for the state-required assessments is provided for use.

Test Administrator Guide for the 2017 Kentucky Academic Standards Science Field Test

Test administrators for the Kentucky Performance Rating for Educational Progress (K-PREP) shall maintain an atmosphere conducive to the successful completion of the assessment. No information about the content of answers may be provided to the students.

Test Administrators should do the following for the 2017 Kentucky Academic Standards Science Field Test
:

- Adhere to testing regulations.
- Verify beforehand that the testing environment will not prohibit students from completing their tasks (e.g., adequate ventilation, no broken furniture, adequate lighting).
- Explain to students how to fill out student combined booklets according to the directions.
- Encourage students to work constructively to complete the assessment; however, test administrators shall not provide any content information for the assessment.
- Notify your Building Assessment Coordinator of printing errors if they are discovered (e.g., misnumbered pages, blank pages, smeared copy).
- Circulate among students during testing.
- Return all materials to the vendor after testing.
- Take all measures allowed by the school to prevent interruptions (e.g., messengers, intercom announcements).

Test Administrators should NOT do the following for the 2017 Kentucky Academic Standards Science Field Test:

- Duplicate or reproduce any part of the assessment in any manner.
- Provide tools except as specifically allowed in the instructions (i.e., dictionaries and thesauri may be provided for writing).
- Answer questions related to the response (no hints, restatements, interpretations, rephrasing for clarification).
- Provide preprinted acronym sheet or paper containing a system for organizing answers (e.g., column method, ROOTs).
- Hover over individual students for extended periods of time.
- Allow distractions.
- Engage in activities preventing their full attention to the students.

All school personnel involved with the assessment program must sign the following certification form. The form should be kept on file in the local district.

I have received and read the *Administration Code for Kentucky's Educational Assessment Program, the Inclusion of Special Populations,* and the Appropriate Assessment Practices Certification Form provided by the Kentucky Department of Education.
