Grade
7th Grade

Subject
Language Arts

Location of adults
Behind her desk when the students watched clips from the film, then circulating around the room as students listened to the audio book and followed along.

Is there a congruent match between learning targets and instructional activities and/or assessments?
Yes

Standard addressed in class:
RL.7.2, 7.3, 7.7

Teacher maximizes use of instructional time:
Agree

Explanation of use of instructional time:
When I entered the room for the observation, students were watching clips from the film "Ender's Game." They are reading the novel in class. Every few minutes, the teacher would stop and discuss how the film compared to the novel. Students also had a packet of discussion questions they were working on as they watched.

Was student work displayed with rubric or target?
Yes

Comments on student work:
reading fair projects are displayed

Does the lesson plan match current teaching and appropriate content?
Yes, evidence

Comments on lesson plan matching current teaching:

Lesson plan and class activities match

Use of technology:

Teacher use

Comments on technology usage:

Students are watching film clips then listening to an audio book

Instructional Practice(s):

Oral presentation, Teacher monitoring

Does lesson plan reflect evidence of before, during, and after reading strategies?

Yes

Student grouping:

Cooperative learning groups

Percentage of students actively engaged:

76 - 100%

How students were engaged:

Students are participating in class discussion comparing the novel and the film, as well as working on discussion questions as they watch clips.

Professional learning witnessed:

No PL implementation witnessed

Communicating:

3: Accomplished - Clear directions and procedures. Explanation of content is well scaffolded. During explanation, student engagement is invited. Teacher's language is clear, correct, and uses appropriate vocabulary.

Suggestions for improving communication:

Questioning and discussion:

3: Accomplished - Some low level questions, questions designed to promote thinking, teachers create genuine discussion, most students engaged in discussion

Suggestions for improving discussion:

Engaging students in learning:

3: Accomplished - Learning tasks and activities are aligned, most students are engaged, pacing is appropriate

Suggestions for improving engagement:

Using assessment in instruction:

2: Developing - Assessment is used sporadically by teacher and students, general feedback, partial student awareness of student criteria, few students assess their work

Suggestions for improving assessment:

Overall observation:

There was good discussion in the classroom comparing the novel with the film version. Students were using details from the text to support their answers.
