Date & Time
2/8/2017 & 12:26:00 PM

Grade
7th Grade

Subject
Language Arts

Location of adults
Front of the room

Is there a congruent match between learning targets and instructional activities and/or assessments?
Yes

Standard addressed in class:
RL 7.1 7.4 and 7.5

Teacher maximizes use of instructional time:
Agree

Explanation of use of instructional time:
Start promptly with flashbacks and then graded the work from yesterday and then transistioned quickly into the white board review

Was student work displayed with rubric or target?
Yes

Comments on student work:
Student work has been displayed in the hall not the classroom.

Does the lesson plan match current teaching and appropriate content?
Yes, evidence

Comments on lesson plan matching current teaching:
Lesson plan matches what is being covered in the classroom today.

Use of technology:

Teacher use

Comments on technology usage:

Teacher is using the smartboard.

Instructional Practice(s):

Cooperative learning, Teacher monitoring

Does lesson plan reflect evidence of before, during, and after reading strategies?

Yes

Student grouping:

Cooperative learning groups, Active engagement

Percentage of students actively engaged:

76 - 100%

How students were engaged:

Students were actively participating in the white board review over text structure. The teacher read the question and gave them immediate feedback after the answer was given. (set up like the millionaire game)

Professional learning witnessed:

Cooperative learning, Quality questioning

Communicating:

3: Accomplished - Clear directions and procedures. Explanation of content is well scaffolded. During explanation, student engagement is invited. Teacher's language is clear, correct, and uses appropriate vocabulary.

Suggestions for improving communication:

Questioning and discussion:

3: Accomplished - Some low level questions, questions designed to promote thinking, teachers create genuine discussion, most students engaged in discussion

Suggestions for improving discussion:

I really liked the activity they did where they had to read the passage and decide together what text structure it was and then put it in a graphic organizer.

Engaging students in learning:

3: Accomplished - Learning tasks and activities are aligned, most students are engaged, pacing is appropriate

Suggestions for improving engagement:

Using assessment in instruction:

3: Accomplished - Assessment used regularly by teacher and student to monitor learning and provide specific feedback, students are aware of assessment criteria and some engage in self-assessment

Suggestions for improving assessment:

Overall observation:

This was a much better observation then the last time I was in here. The quizz on the smartboard worked much better for you class today. I also really liked the text structure that you used in their pods. It not only had them determine the type of structure but had them at the application level as well. I also really liked that you were sure to implement the signal in the class and it seemed to work much better. Next time I come in I would like to see you using a different coteaching strategy in your room. It seems like often when I am in here your coteacher is just assisting. If you have a great coteaching lesson coming up that you would like me to observe just let me know and I will do my best to get in that day.
